

eSAM - Enterprise Strategic Asset Management

With EDI eSAM and EDI as your partner you can finally sleep at night. EDI has developed a preconfigured Maximo system that can be deployed to new Maximo systems, as part of an upgrade or to existing Maximo system. The power of eSAM is simply that we at EDI have taken the leading industry practices and Maximo configurations and have packaged them together in an easily deployable product: EDI eSAM!

EDI eSAM comes standard in Maximo with the following:

- eSAM leading industry deployment of Systems and Subsystems for your Asset/ Location hierarchy.
- eSAM leading industry Failure Code Hierarchy that not only works but helps Maximo to help you with predictive maintenance.
- eSAM leading industry Workflows and business processes already loaded and ready to operate from day one!
- EDI Smart Number solution allows Maximo to finally support Smart Numbering of Assets and Locations without worry of them ever becoming outdated or losing work history!
- EDI Risk Priority Number (RPN) Solutions allow for Maximo to help start your Reliability Centered Maintenance (RCM) plans easily and without the work normally needed for an RCM project. EDI RPN with the EDI Failure codes allows you to start predictive maintenance activities almost immediately.
- EDI SuiteReq request management tool is included with EDI eSAM. With SuiteReq work requests, asset requests, item request are all easily managed, submitted and routed the correct individuals without having to worry about a Maximo license. It's mobile friendly and easy to configure and update. So, as your needs change it can easily change with you.

EDI eSAM isn't just a software solution. EDI has also developed a rapid deployment methodology that not only gives you access to best leading industry practices but ensures your workplace adoption. We have developed training that is effective and lasting. Every role has quick reference guides that allow anyone to see what they need to do quickly and easily. We then also include reporting and analytics. EDI eSAM comes with eSAM reports that are specially created for eSAM processes. We, of course, customize those just for you! With EDI eSAM you can immediately see the benefits you receive from Maximo and your world class processes!

The EDI eSAM solution is the right tool for any Maximo environment. Let EDI show you how much better your Assets can perform with EDI eSAM.
